BRAKE-TECH *Fluid Service*

BSM203

FAST, controlled brake fluid exchange
in 10 minutes or less after hookup.

*The **BRAKE-TECH Fluid Service** is designed to quickly remove old brake fluid and install new fluid using a clean, efficient exchange process. Its pneumatic operation, adjustable pressure, and low-fluid shut-off help support a smooth service while helping prevent air from entering the brake system.*

- ✓ Fully pneumatic design & durable valves provide long life
- ✓ Pneumatic vacuum generator provides excellent suction, no pump failures
- ✓ Adjustable pressure and vacuum up to 100 PSI
- ✓ Complete brake fluid exchange in 10 minutes or less after hookup
- ✓ Low-fluid shut-off helps prevent air from entering the system
- ✓ Clear 3 qt. tanks for easy fluid level monitoring
- ✓ Separate controls for new and waste fluids
- ✓ Adjustable flow speeds for quick, controlled service
- ✓ Technician-friendly one-person operation
- ✓ Compatible with conventional, hybrid, and electric vehicle brake systems
- ✓ Durable, well-balanced cart with easy-roll casters
- ✓ Adapter storage trays keep commonly used adapters within reach
- ✓ Durable metal brake reservoir adapters available separately
- ✓ Durable black anodized panel with laser-etched notes
