COOL-TECH Fluid Service

CSM108

EFFICIENT coolant removal and refill with minimal labor.

*The **COOL-TECH Fluid Service** is designed to remove and refill coolant using a vacuum-style exchange process. Its single-tube design connects directly to the radiator or remote reservoir, helping technicians perform coolant service without disconnecting radiator hoses.*

- ✓ Fully pneumatic design & durable valves provide long life
- ✓ Vacuum-style removal and refill of coolant fluid
- ✓ Helps restore cooling system heat transfer efficiency
- ✓ No need to disconnect radiator hoses
- ✓ Single-tube design connects to radiators or remote reservoirs
- ✓ Vacuum gauge monitors system vacuum level during service
- ✓ Provides option to vacuum leak test the cooling system
- ✓ Large service hose supports quick fluid exchange
- ✓ Clear 5 1/2 gallon waste tank allows easy visual level monitoring
- ✓ Multiple new-fluid containers can accommodate different coolants
- ✓ Durable pneumatic top-off pump designed for engine coolant service
- ✓ Adjustable rubber service cones help provide a secure vacuum seal
- ✓ Easy-roll cart with robust casters for shop portability
- ✓ Durable black anodized panel with laser-etched notes
- ✓ Includes vacuum adapters with initial machine purchase
