COOL-TECH Fluid Service

CSM208

EFFICIENT coolant removal and refill with minimal labor.

*The **COOL-TECH Fluid Service** is designed to remove and refill coolant using a vacuum-style exchange process. Its single-tube design connects directly to the radiator or remote reservoir, helping technicians perform coolant service without disconnecting radiator hoses.*

- ✓ Fully pneumatic design & durable valves provide long life
- ✓ Vacuum-style removal and refill of coolant fluid
- ✓ Helps restore cooling system heat transfer efficiency
- ✓ No need to disconnect radiator hoses
- ✓ Twin-tube design provides both vacuum & pressure service
- ✓ Large service hose supports quick fluid exchange
- ✓ Clear 5 1/2 gallon waste tank allows easy visual level monitoring
- ✓ Patented shut-off valve prevents air from being pushed into the system
- ✓ Retains top-off fluid to adjust system level after fluid exchange
- ✓ Adjustable rubber service cones help provide a secure vacuum seal
- ✓ Stepped adapters for pressure service through de-gas reservoir
- ✓ Easy-roll cart with robust casters for shop portability
- ✓ Durable black anodized panel with laser-etched notes
- ✓ Includes vacuum & de-gas reservoir pressure adapters with initial machine purchase
